Short Talks on Publicity-No. 6

Every manufacturer has been impressed with the transitory nature of Expositions. Whether they last weeks or months, and however impressive a particular exhibit may be, the effect on the public dies out quickly unless followed up by continuous publicity. In order to realize, in sales, on the investment represented by a well planned exhibit, the proprietor should advertise both during and after the Exposition.

TRADE CONDITIONS MARKING TIME WITH GENERAL CROP IMPROVEMENTS

and Cotton Will Mean Good Fall Business.

New York, June 17.-Bradstreet's, reviewing the state of trade, will say to-

Favorable features this week are the further oprovement shown in leading crops and the oding of the tie-up on the great lakes. Wheat, oats and cotton have improved, but corn is still backward, owing to the cool weather. General trade and industry have been quiet and may be said to have "marked time." The notable underlying future of the entire situation is the feeling that with an average crop of wheat and large yields of the other cereals and of cotton now in prospect, a good fall and winter business is to be looked for. Pending further progress in this direction, the tendency is to await events. Prices of leading products have felt the influence of crop news, wheat,

The cross current of ebb and flow noted at different cities, however, may possibly be significant of a change in the tide. Collections still reflect the influence of a backward spring in retail trade, and are complained of as slow at a number of centers. Money continues easy and stock market activity is largely processional.

Crop advices in Hradstreet's tell mainly of improvement. This is most noticeable in winter wheat, harvesting of which has become general in the Southeast and in California, Spring wheat is also making progress along satisfactory lines, An average crop of wheat has been caused in Texas, but the yield in California, Spring wheat is also making progress along satisfactory lines. SUES MINISTER FOR DIVORCE. The Rev. Dr. W. T. S. Barnes

Charged With Infidelity.

REPUBLIC SPECIAL Kansas City, Mo., June 17.-W. T. S. Barnes, formerly the Reverend Doctor Barnes, has been sued for divorce in the Circuit Court. Mr. Barnes was for ten years one of the leading Methodist ministers of Southwest Missouri.

ters of Southwest Missouri.
Four years ago he gave up preaching and went into the real estate business in Kansas City. He is head of the Barnes Investment Company.
Mr. Barnes was married in 1886 in Kansas. He has three children. Mrs. Barnes and her children live on Linwood avenue. In her petition Mrs. Molile Barnes gives the names of five women and asks divorce upon the ground of infidelity. She asks the court to enjoin him from disposing of any of his property or money until her rights can be adjudicated, and asks for alimony. Mr. Barnes said to-day that his wife was very fealous of him, but wholly without cause. He said that when the case was tried it would be shown that he had done nothing wrong. He said that petition would be amended so as to eliminate the names of the co-respondents.

Marine Engineers—A Direct Legacy
of the Days of Action.

The part played by the U. S. battleship lows at Santiago and elsewhere in West Indian waters during the Spanish War is well known. People, however, hardly dream of some of the far-reaching consequences of the discipline which had then to be maintained.

One of the brave men aboard the Iowa bore about with him for several years a very unpleasant reminder of his service on that famous ship. This man is Mr. George E. Parquette, now residing at 35% Sixth avenue, Troy. N. Y., who was a marine engineer on the Iowa when, under command of Captain Bob Evens, she was performing brilliant exploits in battle and in fillbuster-chassing in Cuban and Porto Rican waters. Of those stirring times Mr. Parquette says:

"Whenever we were expecting an engagement our menls were very uncertain, and, when we did eat, we had to be minute men. The constant anxiety and haste affected my stomach and put it in a very bad condition, which lasted for four years, notwithstanding the fact that I was under a doctor's care. I could scarcely keep anything on my stomach, and I suffered greatly from steady pains in the lower part of it. My appetite, too, was very poor, and for four months I was in bed.

"Other troubles developed. I had severe headaches, and at times I feit as if something was clutching at my heart. My blood got out of order, and I had fever and coughing spells. My stomach finally became so bad that I do not think it could possibly have been worse, when, in the fail of 18th. I first heard of Dr. Will-lams. Pink Pills for Pale People, and began the course of treatment, which gave me surprising reilef at once, and finally cured me.

Dr. Williams' Pink Pills agree with the most delicate stomach and create an apmetts.

oured me."

Dr. Williams' Pink Fills agree with the most delicate stomach and creste an appetite. They put the stomach in a condition to digest the food and insure its proper assimilation. They expel poisons from the blood, and they rapidly build up weakmed constitutions and give new vitality to overwrought nerves. They are sold by all druggists throughout the world.

Average Yield of Wheat, Corn | Conservatism Is the Keynote Pending the Revival of Former Prosperity.

> New York, June 17.-Summarizing the commercial situation, R. G. Dun & Co. tomorrow will say:

Industry suffers from an epidemic of ultra-conservatism, emanating, apparently, from the theory that a season of depression must come every ten years, while the coincidence of a presidential election furnishes another precedent. As a result, stocks of merchandise have been reduced, railway traffic is lessened, preparations for future business are curtailed and less money distributed in the form of wages,

rations for future business are curtailed and less money distributed in the form of wages, while those having capital to invest confine their attention to the highest classes of bonds or hold back for still lower security prices.

All these factors have combined to produce a reaction entirely out of proportion to the natural readjustment that was really started by abnormally high prices of raw materials and other excessive costs of production, resulting in accumulation of goods that could not be sold at a profit. Betrenchment has made considerable progress, wage earners as a rule, recognizing the importance of accepting reductions in pay. The lake strike has been adjusted leaving little friction between employer and employe. As the season advances, the crop outlook improves, and there is no fundamental weakness in the nation's commercial or financial position. Evidences of contraction in business are numerous, however, railway earnings thus far available for May showing a loss of 1.1 per cent, as compared with 13rd, and bank exchanges at New York for the last week lost 24.5 per cent, yet at other leading fittless there was small average increase manufacturing in the far the railways have ordered little rolling stock or supplies, and the inquiry for structural steel is particularly disappointing, in view of the fact that building plans filed during May were more numerous than last year. As to value of contemplated work, there were notable gains in Brooktyn, Pittsburg, Indianables and Minneapolis, offset by heavy decreases in New York, Milwaukee, Cincinnati, New Orleans and Detroit. Prices of minor metals are lower and demand small, except that exports for copper continue liberal. Considering the private crop reports, wheat has ruled remarkably firm, the high price having a natural effect on foreign deman. In fact, it was reported that exporters were reselling wheat at Duitth. Stocks will be low when the new crop is harvested, and domestic consumption has absorbed offerings, despite comparative quiet of late at N while those having capital to invest confine

Butter

The "eberyday test" is the best test for butter. and only a small proportion of the butter marketed, stands it.

It is hard to maintain uniform excellence week after week, from one year's end to another.

Butter that never varies in quality, that always has the same delicious flavor, is a good brand to insist on having-when you find it. If all butter was like this, there would be no need for butter testers.

All we ask for Meadow Gold Butter, is that you taste it. As one housewife remarked "it always has a 'more-ish' taste that brings one back for another package." Ask your dealer for it. Sold only in airtight packages.
